## **Jakarta Composite Index**

JCI is truly in their bullish track, recorded another new all-time high at the level of 8,125.20, which at the same time became the closing level of Tuesday's trading session, after soaring 85.16pts / +1.06%, supported by a massive foreign net buy at IDR 5.55T (All market). This green candle negates the threat of the previous Dark Cloud candle, especially as it is also supported by soaring Volume.

**KIWOOM RESEARCH** still suggests investors/traders to gradually Average Up on each portfolio, when resistance layers are able to be broken one by one; while not forgetting to keep placing a Trailing Stop. Example TS: let your profit run as long as JCI is still moving above MA10; or as long as JCI has not closed below the previous day's Low point. The round number 8,000 should serve as the current (nearest) psychological Support.

**ADVISE:** AVERAGE UP accordingly, set your TRAILING STOP; Let your profit run.
