Jakarta Composite Index

JCI recorded a new all-time closing high at 8,250.94, appreciating 84.91 / 1.04% despite briefly climbing to the intraday record high level of 8,272.63, seemingly trying to negate several recent bearish reversal candles. From a big picture perspective, JCI's uptrend is still intact within a RISING WEDGE pattern and aligned above the MA10 & MA20 platforms. As long as this pace can be maintained, it is not impossible that the TARGET of 8,500 – 8,600 could be reached even before the end of the year.

KIWOOM RESEARCH advises investors/traders to pay attention to trading opportunities arising from sector rotation in the Banking sector, as stock prices have not moved far from long-term Support.

ADVISE: Set your TRAILING STOP, as long as JCI is still moving within the bullish pattern & platform, it is not urgent to liquidate your portfolio. However, portfolio trimming may be carried out if several critical Supports begin to break.
