Jakarta Composite Index

JCI closed down 0.06% at the 6,595.78 level on Wednesday's trading (09/02), after moving in a range of 6,561.00 – 6,629.54. Foreign investors recorded a net sell of Rp235.16 billion in the Regular Market. Technically, JCI remained sideways. The RSI (14) edged down slightly to the 63.8 level, indicating bullish momentum still has room to continue. As long as JCI can hold above the EMA10 in the 6,510 area, the chance of strengthening remains open to retest the 6,635 resistance and the chance of closing the gap area at the 6,733 level, with the next gap area at the 6,858 level. Conversely, should profit-taking occur, JCI could correct back toward support at 6,551 and 6,510 (EMA10) and 6,454. **KIWOOM RESEARCH** still advises a strategy worth considering is to hold or selectively average up as long as JCI can hold above the support area, while investors need to increase caution should the index break through support.

ADVISE: Hold or selectively average up.
