Market Overview

US AI SECTOR PROFIT-TAKING, RENEWED US-IRAN TENSIONS, AND INDONESIA'S 2026 RKAB REVISION

US MARKET: Wall Street closed sharply lower in Friday's trading (10/30/26), with Nasdaq Composite plunging 2.86% to 25,437.00, S&P 500 falling 1.82% to 7,580.07, and Dow Jones Industrial Average correcting 1.09% to 51,770.31. Intel was the main drag after its shares fell 28.6%, followed by AMD, which weakened 10.9%, and Nvidia, which fell 4.2%. S&P 500 technology sector recorded its largest monthly decline since March 2025, while the communication services sector experienced its deepest correction since April 2022. On a monthly basis, Nasdaq fell 6.6%, S&P 500 weakened 0.9%, while Dow Jones strengthened 1.7%.

MARKET SENTIMENT: Market sentiment tends to be negative with increasing investor caution over technology company valuations and the profit prospects from AI investment. The market is beginning to demand concrete proof that the large AI infrastructure spending can generate commensurate returns on investment. On the other hand, the third-quarter earnings season showed relatively solid performance, with 82% of the 299 S&P 500 companies that have reported results beating analyst expectations. Quarterly earnings growth for S&P 500 index is also estimated to reach 31.6% YoY.

GEOPOLITICAL: Tensions in the Middle East escalated after reports emerged that senior US military commanders had briefed President Donald Trump on options for new strikes against Iran. Trump again threatened the possibility of further military action, while Tehran asserted that it will not soften its position in resolving the conflict. The situation in the Strait of Hormuz also heated up after two separate incidents involving tankers. In Eastern Europe, Ukrainian forces reportedly attacked a Russian oil refinery in the Samara region, while Russia again launched attacks on Ukraine.

REGULATION & POLICY: The Federal Reserve held its benchmark interest rate at Wednesday's meeting. However, the 0.5% increase in the PCE price index in September, which was the largest monthly increase since March, reinforced expectations of monetary policy tightening at the end of the year. Based on the CME FedWatch Tool, the probability of a Fed rate hike in December reached around 72%. Meanwhile, the Bank of Japan (BoJ) held its policy interest rate at 1.25%, in line with market expectations.

FIXED INCOME & CURRENCY: The US Dollar Index (DXY) was relatively stable around the 102 level, but still recorded a 0.5% gain throughout October. The Japanese Yen strengthened toward JPY157 per US Dollar and continued its gains for three consecutive sessions. In the bond market, the 2-year US Treasury yield was stable at 4.60%, while the 10-year held at 4.93%. Throughout October, the 10-year US Treasury yield fell about 36 bps. In Japan, the 2-year government bond yield fell to 1.88%, while the 10-year moved below 2.8%, near its lowest level in almost three months.

EUROPE & ASIA MARKETS:

- **Europe: Stock markets moved mixed.** UK's FTSE 100 was relatively stable, supported by the performance of AstraZeneca and BP. Germany's DAX fell 0.9% to 25,818, while France's CAC 40 closed flat at 7,969. STOXX Europe 600 weakened 0.36% to 646.75.
- **Asia: Most stock markets weakened.** Japan's Nikkei 225 fell 2.12% to 63,290 and South Korea's KOSPI plunged 3.48% to 5,731. In contrast, Hong Kong's Hang Seng strengthened 1.5% to 23,294. Singapore's STI fell 0.36% to 5,377, while Malaysia's FKLCI rose 0.28% to 1,616 and India's BSE Sensex strengthened about 0.4% to 74,460.

COMMODITIES: Brent rose 2.37% to US$113.43/barrel, while WTI strengthened 2.08% to around US$104.12/barrel. Throughout October, crude oil has strengthened about 15%. Coal rose 0.20% to US$150.45/ton, approaching its highest level in the past three years, supported by high LNG prices. In contrast, gold corrected 3.65% to below US$3,875/ounce. Copper fell 1.83% to US$648.20/lb, tin weakened 1.66% to US$48,873/ton, and nickel corrected 1.71% to US$15,271/ton. Meanwhile, Malaysian CPO strengthened 1.32% to MYR4,449/ton, supported by an increase in export shipments of 46.9%–67.7% in the period of October 01–25 compared to the same period last month.

MACRO ECONOMIC NEWS

- The Bank of Japan kept its short-term policy rate unchanged at 1.25% in an 8-1 vote at its October meeting, in line with market expectations.
- The German economy expanded 1.2% YoY in Q3 2026, the highest annual growth rate in four years, compared with 1% in Q2 and forecasts of 1.1%.
- The GDP in the Eurozone expanded 1.3% YoY in Q3 2026, the most in over a year, following a 1.2% rise in Q2 and compared to forecasts of 1.1%, preliminary estimates showed.
- US benefit costs, a component of compensation costs for civilian workers, rose 0.9% QoQ in the third quarter of 2026, easing from a 1% increase in the previous period. Benefit costs increased by 0.9% in the private sector and by 0.7% in state and local government.

TODAY'S AGENDA: China (CN): RatingDog Manufacturing PMI October. **United States (US):** ISM Manufacturing PMI October. **Indonesia (ID):** Manufacturing PMI, trade balance, inflation, exports-imports, and tourist arrivals.

INDONESIA: Indonesia's trade balance surplus in September 2026 is projected to shrink to US$3 billion, lower than August's realization of US$3.55 billion. BSI Chief Economist Banjaran Surya Indrastomo estimates exports will reach US$26.4 billion, or grow 7.1% YoY, while imports will increase more strongly by 15.3% YoY to US$23.4 billion. Export performance is still supported by high coal prices, while the increase in imports is driven by rising world oil prices as well as the need for raw materials and capital goods to support domestic manufacturing activity. This condition has the potential to pressure the trade surplus as import growth outpaces exports.

- **In addition, the government set the national nickel ore production quota at 290 million–300 million tons for 2026 through a revision of the RKAB.** However, the production quota in 2027 could be lower following oversupply conditions in the global market. The Ministry of Energy and Mineral Resources (ESDM) recorded excess nickel inventory of around 750,000 tons at the London Metal Exchange (LME) and the Shanghai Futures Exchange. The government will consider global supply conditions and the raw material needs of domestic smelters in determining the next quota to prevent an increase in Indonesia's production from worsening the imbalance between world nickel supply and demand.

JCI closed 0.80% lower at 5,057.05 in Friday's trading (10/30/26). Based on transaction data on October 30, 2026, foreign investors recorded net sell of Rp172.43 billion in the regular market, and net sell of Rp140.27 billion across all markets, while cash and negotiated transactions recorded net buy of Rp32.16 billion. Accumulated foreign net sell on a YTD basis reached Rp126.37 trillion. The largest foreign net buying was recorded in GOTO, MDKA, BUMI, ASII, BBNI, BRMS, CPIN, DEWA, PACK, and CUAN. Meanwhile, the largest foreign net selling occurred in BBRI, TLKM, AMMN, PTBA, TINS, ANTM, ISAT, BMRI, TPIA, and DSSA. Technically, JCI continued its downtrend but rebounded after briefly touching the 4,980 support. The RSI (14) indicator fell again to 27. In a scenario of renewed volatile weakness, JCI is expected to be vulnerable to testing the nearest support at 4,980 / 4,907 again. If it breaks down, JCI could continue toward support at 4,456 (FR 161.80%). Meanwhile, in the rebound scenario, JCI has the potential to move in the resistance range of 5,116 / 5,182 / 5,249. Investors are advised to remain cautious, apply a buy on weakness strategy selectively or tend to wait for clear signal confirmation.
